

INVESTIGATIONAL MENINGITIS B VACCINE RESEARCH STUDY IN INFANTS

A clinical study is happening right now to study an investigational vaccine against Meningitis B, which is an infection that can cause lifelong disabilities and can lead to death.

Your baby may be eligible to participate in this study if he or she is healthy and between 6 to 12 weeks old.

Vaccine research study

If you are interested in learning more about this study or if you know another parent who may be interested in participating, please contact:
